

Executive summary: “Violence against women and its financial consequences for businesses in Peru”

In 2012, 23.24% of paid female workers* in Peru were affected by some form of violence by their partners or ex-partners. As a result of violence against women, 70 million working days per year are being lost, representing a loss of business value added of at least 6,744 million US dollars, equivalent to 3.7% of GDP.
